FIGHT FRUIT LOGISTICA

Be part of the action days!

Fruit Logistica is the world's largest fruit trade fair, held every year in Berlin. At this event, companies meet there to conclude contracts wherever possible. It is a trade fair for the few. The perspectives and interests of small farmers, agricultural workers, seasonal workers, day labourers, union organisers and environmental activists are deliberately absent. They are the people who work hard every day to grow fruit and vegetables and who fight against the inhumane working conditions.

Protest 5.2. - WE FIGHT

With our protest in front of the trade fair, we want to draw attention to the abuses in the agricultural industry worldwide. We demand an agricultural system rooted in food sovereignty that provides us with healthy food, protects ecosystems and guarantees fair working and living conditions for all.

People's Tribunal 6.2. - Fruit Logistica ON TRIAL

We are publicly accusing Fruit Logistica, and the companies present, of systematic exploitation and oppression. Our People's Tribunal will be a joint trial by the people for the people. Anyone can participate. Various individuals will share their experiences of working conditions and unfreedom along global supply chains, climate and environmental justice and health, as well as repression of organising and protest. We will then develop joint strategies in workshops. The People's Tribunal will end with a joint analysis and collective conclusions.
